## O vsebini <Short summary:

Avtor in izvajalci si postavljajo vprašanja, ki se nanašajo na človekov osebnostni razvoj.

Kaj, kako in kdo ga oblikuje?

Teoretična vprašanja, ki jih najdemo v učbeniku psihologije, mlademu človeku na robu dvajsetih, postanejo pomembna. Prepozнатi svoje determiniranenosti, prednosti, potencialje, odzive, želje... Gre za nič manj kot eksistenčno vprašanje, ki ga narekuje nuja: najti notranjo trdnost in oporo za nepredvidljivo prihodnost.

< The author and the performers are asking themselves questions about one's personal development. What, how and who forms it?

Theoretical questions that are found in the psychology textbook are becoming important to the young person on the verge their twenties. To recognise what determines them, their advantages, potentials, responses, wishes ... it is nothing less than an existential question spurred by necessity: to find inner stability and support against the unpredictable future.
